This is a **demo trick of the iGrowthful SEO Strategies:** <u>https://igrowthful.com/seo-strategies/</u>

By the way, let's get started...

In the era of Google updates, it is difficult to survive with a simple website.

This is why, a few days ago, I created a new site by applying a unique SEO strategy. I was able to rank #1 in just 3 days of being indexed.

Proof of my website:

I built this website in September 2023 and within 3 days (after the index) of building it, I got the #1 position at Google. Besides, I got many positions in Google for several keywords.

Let's know in detail how you too can make such a website,

Niche Research

Well, first of all, we need to research a niche that people are searching for but there is no website for it on Google. Overall, people are not satisfied with the search.

For this, we will try to find niches that once existed but do not exist now.

Let's give a small example of what type of niche we should look for:

Let's take YouTube Vanced as an example.

According to Wikipedia, YouTube Vanced was a modified third-party YouTube application for Android with a built-in ad blocker. Other features of the app include SponsorBlock, background play, free picture-in-picture, an AMOLED black theme, swipe control for brightness and volume, and the ability to restore dislike counts on YouTube videos.

The app was shut down in 2022 after receiving a legal notice from Google.

← Post

Vanced has been discontinued. In the coming days, the download links on the website will be taken down. We know this is not something you wanted to hear but it's something we need to do. Thank you all for supporting us over the years.

10:55 PM · Mar 13, 2022

...

The app had already gained a lot of popularity. But suddenly, the activity of the app was completely stopped. Due to which other websites which had this app, the file was also not working.

Due to such a sudden closure, people are in trouble. That is, people needed it, but Google didn't have it.

Several days later,

Suddenly a developer decides to rebuild the app.

Since there was demand in the market, but not supply, rebuilding the app will likely respond again.

A rebuild was done with the help of a few contributors which is still going on.

According to SimilarWeb, it has 4.8 million visitors monthly.

Even, it also runs Google AdSense ads.

However, since it is illegal, we do not support it.

But we learned from this, we can exploit such opportunities.

So, let's find out how to find this type of demandable niche.

First Step: Plug the URL of SimilarWeb, Siteslike, Alternativeto, etc. type websites into Ahrefs and filter by position #1. You can also set a specific volume if desired, although this is not important.

■ Organic keywords	/

Keyword 💌 URL 💌	

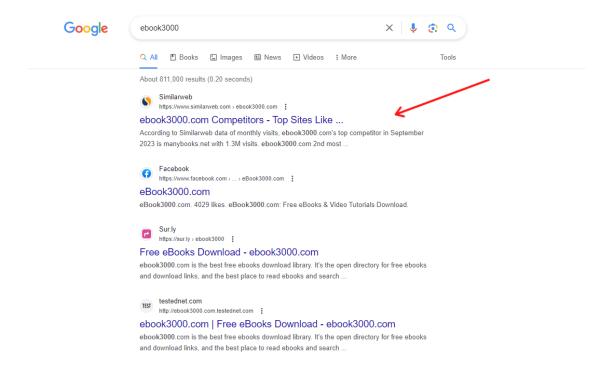

Note: We will use only SimilarWeb, Siteslike, Alternativeto, etc. type websites for research. Because these websites only provide website information.

By doing this, we will find many niches or keywords that currently have no activity.

For example, I got this data through Keyword Everywhere Organic Ranking Keywords for the SimilarWeb website, where this keyword is ranked #1, the average search volume is 27100, and previous months' trends are also good.

	습	hanindisk	880	3	210	\$0.00	0	athatth	8%

After searching, I found this data on SERPs where SimilarWeb is ranked number 1.

Even those who ranked at number 2, 3, 4, and other places did not fill user or search intent on this keyword.

Second Step: Let's visit the URL to understand whether this domain is working or not.

That's perfect. We can take this keyword to build.

You can also use Reddit to find websites that have already been shut down.

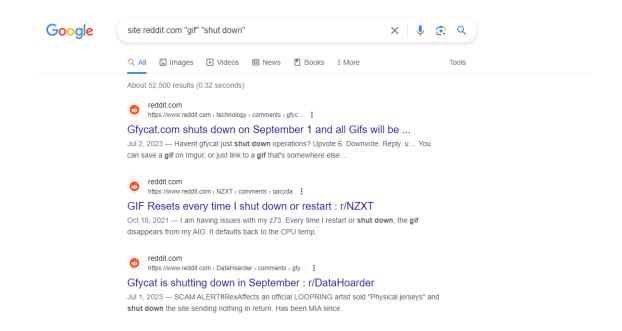

Follow the guide below to find all the websites that are shut down but we can rebuild them if needed.

First Step: Go to Google and search using the following operator.

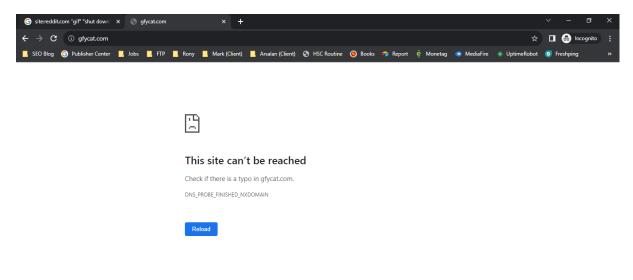

```
site:reddit.com "your keyword" + "shut down"
```

Example: site:reddit.com "gif" "shut down"

f

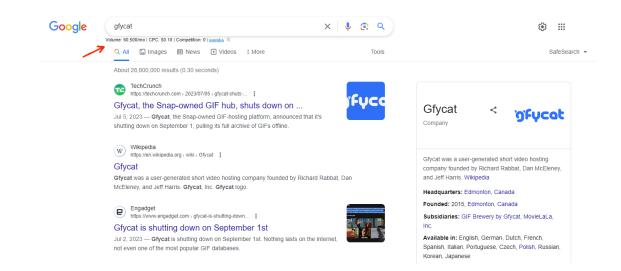

Second Step: Let's check this domain.

No, it's not working.

Third Step: Let's search Google for this keyword.

As you can see, this keyword has an average of 60500 monthly search volume. However, the pages in the search did not fulfill the intent of this keyword.

This is how you can find website to rebuild.

Warning

Warning 1

Before choosing a keyword, you must understand what exactly people are searching for in that keyword and what they are actually looking for. As an example, let's take the "Essentials" keyword.

After I searched it, I saw that it has about 1500000 search volume.

Even the exact match domain is also available to buy.

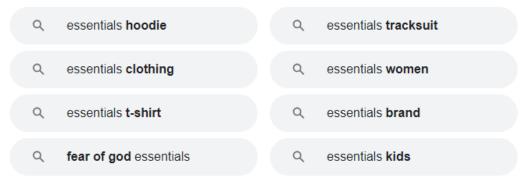

THE DOMAIN NAME

Now if you buy this domain and make a content site, it won't work. But why?

Because people are searching this keyword for clothes.

Related searches 3

I mean, Essentials is a clothing brand and they are looking for Essentials clothing.

So, it would not be a good choice if you want to create a content website.

Because people are searching for clothes using this keyword, not general content.

So, you must understand the search intent and proceed accordingly.

Warning 2

You must keep the copyright issue in mind while researching.

For example, you find a keyword or niche that you can easily rank #1 by building a website, but the keyword or name is copyrighted, then you must drop that keyword.

Find only keywords that are general and have no copyright issues.

Warning 3

Research is very important in this SEO strategy.

So, you have to research very carefully. No mistakes can be made.

Domain

Once you get your desired keyword, definitely buy Exact Match Domain (EMD) domain. If for some reason you don't get a .com extension, then buy .net, .org, .info, .io, etc. extensions domain.

EMD domain is most important in this strategy.

Website Building

A developer can be hired to build such a website if you are not a developer yourself. Or you can find niches or keywords that don't require any development.

Or if necessary, you can do it with online tools like ChatGPT.

For example, calculators can be created with ChatGPT or Google Bard.

Indexing

Indexing is very easy these days.

Add site to Google Search Console and send indexing request.

Or, you can use Google Indexing API to make indexing faster.

Promotion

You can submit your website to Product Hunt, Beta Lists, etc. websites. And at the same time, you can share some social.

Result

If everything goes well, you will reach the #1 position in just 7 days.

Because you have no competitors, and you are filling the demand of users. Remember, the main part of this SEO technique is research. So, try to be careful.
